Subject: Re: completion of the predrilling chart

There are some that just had methane but no other analytical data. Thanks!

Karen

I found 7 on Mike's desk. I added them to the sheet and will plot ASAP.

That brings me to 87 with 5 missing lat lon info, so 82 will be plotted. I am not sure where the others are, I did a quick count of the ones on your desk and this seems to be accurate for the ones i can find...
have a good trip

Karen

I have not seen Mike yet today...

I can plot the excel sheet you gave me, however you mention 98 from Cabot, the excel sheet you gave me has 80 names and only 75 locations associated with those names. 5 of the lat lons are missing.

Mike- if you could complete the last couple residences you have and add it to the EXCEL chart I sent to Dennis last night and copy Vicky- thanks!

Ex. 5 - Deliberative

Thanks! I'll see you all Monday, but will have my BB with me on the trip. Thanks!!!
